Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an enterprise employee / requester	submit and track network service requests easily	I experience long fulfillment delays and lack status updates	requests are processed manually through fragmented emails and paper forms	frustrated and delayed in work
PS-2	an IT network administrator	manage, approve, and execute network tickets efficiently	I get incomplete request data and lack automated workflows	there is no centralized platform with dynamic validation rules or approval routing	overwhelmed and prone to errors
